Polyester coated steel sheet is usually easy to clean. Please do not use any aggressive cleaning agents. If special cleaning agents need to be used to remove stubborn stains, please make sure to adhere to the appropriate accident prevention and precaution instructions of the cleaning product. Please make sure to ventilate the rooms sufficiently.

I. REGULAR CLEANING:

The cleaning of stains and residue on organic coatings ensures a lifetime of the product. Please use warm water, all purpose cleaning agent or special cleaning agent.

Please do not use any cleaning agents damaging the coating chemically or mechanically. Do not use cleaning agent containing any solvents.

Please do not use any strong alkaline cleaning agents like alkali, soda, strong acids or cleaning agents with abrasive elements. Please make sure to rinse with a sufficient amount of clear water to remove any remaining cleaning agent.
Possible cleaning agents to be used:
Pril, Rei, Henkel, P3-T768, P3 – allplass and all purpose cleaning agents.

II. STUBBORN AND SPECIAL STAINING

Please use rather acid and neutral cleaning agents than alkaline cleaning agents. The following products must not be used:

- Organic solvents
- Chlorides
- Strong acids and alkalines
- Cleaning agents for metals

Please avoid scrubbing with cleaning agents containing abrasives (Ajax, Vim, Imi, Ata, etc.), dry wiping and the use of hard brushes.
